John Clover's death, the details of which are given on the first page was the greatest shock to the oil him at the last moment his old frield, George White, seems like a drine providence.

All Tulsa is in mourning.

### To Celebrate Thanksgiving Right

Wilcox OH & Gas company

both whooping things up at the rate of about 1,150 barrels daily production eachs.

To the south in 32-15-9, the Wilcox company is drilling at 3,205 feet on its test which is planned to be made the deepest test in this entire territory. The oil formations are very high here, and the sands look unamally favorable.

On its Harchechie allotment test in 21-16-8, it has landed the 6-inch casinss at 2,025 feet and is now drilling in the very hard shell that everlies the Wilcox sand pay. The total depth is 3,030 feet and since the good showing at the top of the well, they have all reasons to expect to encounter an unusually rich pay. On the Amos farm in 34-116-8, the same firm is drilling and the top of the Dutcher sand just short of 3,200 feet. This test is a mile and a half west of the big well on the Kelly farm which came in election day and is still making from 500 to 500 barries daily while uncompleted.

Offsetting the Kelly farm test, the Wilcox Oil & Gas company is starting drilling today n its Harry farm test located in the southwest corner of the east half of the southeast of Bristow the Peggy Sewell

Pipe Will Be Cheaper

WASHINGTON, Nov. 24.—Long relayed shipments of oil well supplies to Oklahoma fields are now beginning to move as a result of the meetal which are now as a result of the meetal of the interstate commerce commission allowing the erritory file by the mills and supply commanies without requiring permits have been required. This was due to the fact that the coal situation in a number of sections was acute. During that period only as gendless could be loaded daily with nipe, casing and other oil well supplies or in the Pitisburg-Youngstown district. It is in this district that practically all oil well supplies or in the Pitisburg-Youngstown district. It is in this district that practically all oil well supplies or fernate. On the Pitisburg-Youngstown district. It is in this district that practically all oil well supplies or fernate.

Offsetting the Kelly farm test, the Wilcox Oil & Gas company is

of Bristow the Peggy Sewell in 28-16-9 is swabbing mape and making from n nice shape and making from 100 to 600 barrels per day. Several

set to the south.

#### Future of Mexico's Oil Hinges on New Fields

The Argon of Common in the southeas of 6-21-4, is 1 2 and an effect games in shad found at 2.228 feet. They are but 2 fort in the max.

MEXICO CITY Mexico, Nov. 24.

Reduced production of oil in the famples district and the need of recommanding development work in new places are believed to be the third reasons for the proposed new Mexicon oil laws which are in many ways more favorable to the oil companies than seemed possible in face of recent debate here. Although subjections here have said nothing about the encroachment of sail water upon the oil wells, the situation in the Tampice fields is well known, especially among government offinis.

It is known that the future of

in the Tampiee fields is well knewly compensions, and it is known that the future of Mexico's oil industry hinges upon the development of promising new olds such as Zacamixtle, and the finding of new poels. This calls for the h azarding of large sums of money in the gamble for oil.

While the oil wells were gushing forth their streams of petroleum many persons thought that the flow would never cease and were load in alking over of the oil property by the government and few of the agitators were in favor of paying anythink for the wells. They professed to think that Mexico was being robbed by the oil companies and could justly claim ownership of the producing fields. But "nationalization" of fields site of the southeast of the northeast of the southeast o

tion in the tax is a bout 1 per cent.
The tax will average about 5 per
cent of the value of the refined oil.
The tax on crude oil is fixed by the sed new law at about 19 cents

It is expected that n umerous changes in the law will be made be-fore it is passed by the Mexican congress. Manuel Padres, assistant accretary of the treasury, intimated when the proposed law was an-nounced that objections and sugges-tions for changes by the oil producers would receive the attention
of the government.
Persons coming from Tampico

av that the situation in the fields is growing more serious be-cause of the continued enforced shutting down of wells, due to the encroachments of sair water.
